ABRASIVES

1909 siawood – The abrasive for universal wood sanding

1909 siawood is the ideal abrasive for sanding all types of wood – designed especially for the universal requirements found in the joinery and carpentry industries.

Its half-open coating makes 1909 siawood perfect for frequently changing materials, and therefore ideal for softwoods and hardwoods. Thanks to the proven TopTech technology, it is a winning combination of ultimate Swiss surface quality with simultaneous minimum clogging and a long lifetime. The flexible and adaptive e-wt paper backing is extremely advantageous for use with sanding pads on stationary machines.

Advantages

- Economic all-round product for sanding wood
- Very versatile
- Perfect surfaces thanks to TopTec
- Dust-free process: antistatic construction gives low dust formation on belt, work piece and machinery
- Flexible, adaptive e-wt paper backing

Application

Hand sanding

Cross belt sanding

Stroke belt sanding

Combined wide belt sanding rollers/pads

Product profile

Grit type:	aluminium oxide
Bonding:	synthetic resin
Backing:	e-wt paper
