

## Safe use of abrasives training course

It is a requirement of the Provision and Use of Work Equipment Regulations (PUWER) that all people who use, supervise or manage the use of work equipment have received adequate training. Master offers the solution to ensure this requirement is covered for employers, helping to keep their workforce safe - the safe use of abrasives training course, **accredited by the British Abrasives Federation** - issuing all who have attended and passed the course with a certificate.

The safe use of abrasives course covers the following topics:

- PUWER 1998
- Regulatory Bodies involved in Abrasive Safety
- What to Consider When Ordering a Wheel
- Wheel Marking System & Requirements
- Wheel Mounting
- Machine Guards
- Storage and Handling
- Personal Protective Equipment - PPE
- An Introduction to Legal Requirements
- BAF General Safety Recommendations for the use of Abrasive Wheels
- Publications Available from BAF

The programme can be tailored to your specific needs and can even be expanded to include application recommendations for abrasives to improve performance according to customer needs.

**Pricing:** £550 per session (maximum 10 trainees)\*
