

MASTER ABRASIVES

Master Abrasives appoints distributors in Mexico for the MASTER brand

Master Abrasives is pleased to announce the appointment of two distributors in Mexico, ABBRE, based in Monterrey and covering North Mexico, and MEHSI, based in Querétaro and covering Central and South of Mexico. Both companies will be distributors for the MASTER brand of abrasive products, including mounted points, carbide burrs, flap wheels, MASTERFLEX® polishing products, abrasive belts, and lap mops. They will also promote the newly added products in the range to meet the needs of demanding applications, including Unitized products, Convolute wheels, rubber finishing products, quick change discs and finishing media and consumables.

In the precision range of products, Master offers grinding wheels and stones, cut-off-wheels, rotary and stationary dressing tools, and superabrasives. Products recently added to this category include a range of honing stones for hydraulic and finishing applications in both conventional and superabrasives, along with a range of superfinishing stones and wheels. Within dressing products, the Master brand now offers precision reverse plated Diamond roller dressers, together with quality stationary dressers to complement the existing range of Master grinding wheels and provide cost-effective application solutions.

Further information on Master Abrasives distributors in Mexico will soon be available online.
