

Quality Measuring Equipment

Master Abrasives aim to offer the UK engineering market a complete grinding solution. To complement the already extensive product offering, Master Abrasives now offer Innovative Automation Products' range of measuring equipment to enhance the grinding process including optical, air, co-ordinate and other areas of metrology. The below equipment is available for viewing and demonstrations at our grinding and finishing showroom.

Air Metrology

- Available as single or multi-channel and with single or double displays
- A double channel single display air gauge with an RS 232 port for the computer interface available for viewing at our grinding and finishing showroom

Prices from £530.00*

Co-ordinate Metrology

- 1D and 2D height gauges available in manual and motorised versions with measuring lengths of 325, 625, 1025 or 1150mm
- The 2D height gauge featuring a colour graphical LCD display with a measuring range 625mm available to view at our showroom

Prices from £2,630.00*

Optical Metrology

- Profile projectors available as vertical, horizontal, slant screen and offset with a 200-1000mm screen diameter
- Vertical profile projector V400-HP with a screen diameter of 400mm on display in our showroom

Prices from £4,090.00*
