Balancing Systems

RK-SYSTEM®

Representing RK-System, we offer VibroDAQ, a professional measurement system for balancing and vibration. These instruments can be used in various industries involved in maintenance of mechanical equipment in different types of companies.

The VibroDAQ is ideal for use on those machines without automatic balancing options and is easy to use. It allows for grinding wheels to be balanced in situ ensuring rapid, accurate wheel balancing.

Description

A professional measurement system for balancing and vibration.

Applications

- balancing grinding wheels in situ
- balancing rotary shafts

Pricing

VIBRODAQ BASIC -1 plane balancing-

VIBRODAQ STANDARD -1 or 2 plane balancing-

VIBRODAQ ADVANCED -1 or 2 +FFT+signal visualisation-

VIBRODAQ PORTABLE BASIC -1 place balancing-

VIBRODAQ PORTABLE STANDARD -1 or 2 plane balancing-

VIBRODAQ PORTABLE ADVANCED -1 or 2 +FFT+signal visualisation-

Features

- 1-4 plane rotor balancing
- LCD touch screen display
- USB 2.0 and RS-232 communication interfaces
- vibration graphs and spectrum analysis available
