

MASTER[®]

Heavy Duty Burrs

Master heavy duty burrs are a range of burrs designed specifically for high stock removal applications. The unique geometry makes the burrs run smoother, last longer and reduce vibration levels.

These burrs made from high-quality tungsten carbide are an excellent solution for metal removal applications, such as blending cast lines.

Availability

Master Heavy Duty Burrs are offered from stock in various different shapes and sizes:

- C081906 HD
- C102006 HD
- C122506 HD
- E122206 HD
- F122506 HD
- L102706 HD

Other shapes and sizes can be made to order.

Applications

Excellent for applications where high stock removal is required. For blending cast lines, digging out and radius work.

Ideal for use on materials such as WCB carbon steel, stainless steel, duplex, super duplex and nickel based materials.

Benefits

- High stock removal
- Low vibration
- Long lasting
- Smooth running

ZIPP® air angle die grinders - the right tool for the job
