

MASTER[®]

SAWPRO

Grinding Wheels

Master SawPro range of superabrasive and conventional grinding wheels have been specially engineered for the saw industry.

The wheels provide the ultimate solution for high performance in the production and re-sharpening of circular saws.

Availability

We manufacture all wheel shapes and sizes. The popular industry superabrasive wheels are:

14F1 CBN Wheels

- To suit e.g. Loroach machines
- Radius sizes from 0.65mm to 3mm
- Popular sizes available from stock

Diamond Wheels

- For top and face grinding
- To suit e.g. most Vollmer machines
- Popular sizes available from stock

Contact us for our complete range of conventional grinding wheels.

Features

Utilising a high technology bond system, the cool cutting action and long lifetime make sawpro wheels a leading alternative to other manufacturer's wheels, offering excellent performance and great value for money.

Applications

- Manufacturing of High Speed Steel Circular saws
- Re-sharpening of High Speed Steel Circular saws
- Sharpening Tops of Carbide Tipped Saw teeth
- Sharpening Faces of Carbide Tipped Saw teeth

Master's technical team are happy to assist with the assessment of your grinding process.
