

# MASTER ABRASIVES

## Spindle Repairs

Representing KW Abrichttec GmbH Spindles in the UK, Poland and Mexico, together we offer an independent repair service with extensive experience of spindles used in a wide range of applications.

We provide repair, maintenance, and modifications of all types of spindles including grinding, milling, machining centres and more. Together we offer fast, high-quality solutions that minimise costly down time.

## Repair service

Among grinding, main and auxiliary spindles we repair, maintain and modify grinding spindles as well as ride trestles for all machine types. We have all major spindle brands repaired at our partner KW's Spindle Clinic.

## Common spindle problems

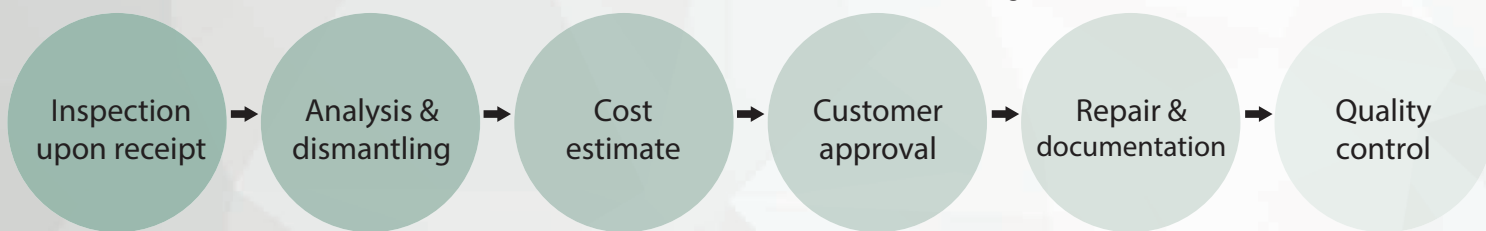

- storage or water damage
- temperature problems
- machine crashes
- measuring system failure
- defective rotary feedthrough
- tool clamping problems

## Further services

We also provide further spindles services:

- Maintenance
- Modification
- Conversion
- Rebuilding

## Process

Spindle Repairs  
compliment our  
Machinery & Equipment range
