

MASTER[®]

ULTRA CERAMIC[™]

Quick Change Discs

Master Ultra Ceramic quick change discs are designed for aggressive grinding and blending with superior cut rate and life span.

The grain fractures to form new points which are sharp and precise resulting in a cooler cutting action and extra-long product life. The discs also require less pressure, resulting in reduced operator fatigue.

Availability

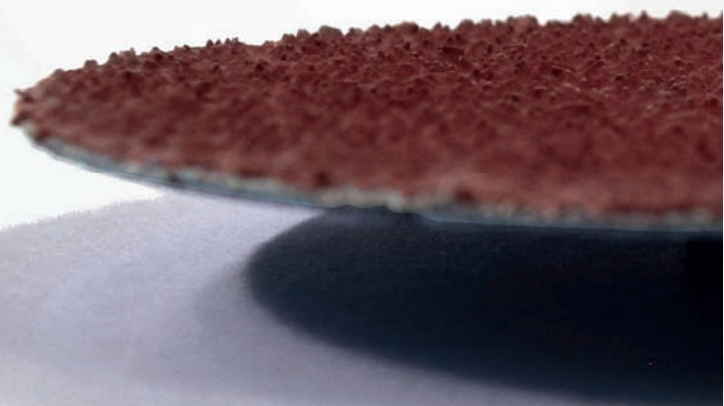

Master Ultra Ceramic quick change discs are available in 51 and 76mm diameter in 36, 60 and 80 grits. These discs are fitted with MRD type plastic threaded screw-type mounting system, also known as 'Roloc' style.

Benefits

- Long product life
- High stock removal rate
- Cool cutting action
- Reduced operator fatigue

Applications

- Sand castings for removing risers and flashing
- Lost wax castings for removing risers
- Heavy fabrication such as large burr removal
- Tig/mig weld removal

ZIPP® air right angle grinders - the right tool for the job
